Guardion Health Sciences, Inc. Announces Closing of Initial Public Offering

San Diego, CA – April 9, 2019 – Guardion Health Sciences Inc. (“Guardion”) (Nasdaq: GHSI), an ocular health sciences and technologies company that develops, formulates and distributes condition-specific medical foods and testing technologies supported by evidence-based protocols, today announced that it closed its initial public offering of 1,250,000 shares of its common stock at a public offering price of \$4.00 per share for total gross proceeds of \$5.0 million, before deducting underwriting discounts and commissions and other offering costs and expenses payable by Guardion. In addition, Guardion has granted the underwriters a 45-day option to purchase up to 187,500 additional shares of common stock at the public offering price, less underwriting discounts and commissions, to cover over-allotments, if any.

The shares began trading on the Nasdaq Capital Market on Friday, April 5, 2019, under the symbol “GHSI.”

WallachBeth Capital, LLC acted as the lead manager for the IPO and WestPark Capital, Inc. acted as co-manager.

About Guardion Health Sciences, Inc.

Guardion is an ocular health sciences company that develops, formulates and distributes condition-specific medical foods supported by evidence-based protocols, with an initial medical food product that addresses a depleted macular protective pigment, a known risk factor for age-related macular degeneration (“AMD”), and a significant component of functional vision performance. Guardion Health Sciences, Inc. has also developed a proprietary medical device, the MapcatSF®, which accurately measures the macular pigment density, therefore providing the only two-pronged evidence-based protocol for the treatment of a depleted macular protective pigment.

About VectorVision®

VectorVision® specializes in the standardization of contrast sensitivity, glare sensitivity, low contrast acuity, and ETDRS acuity vision testing. Its patented standardization system provides the practitioner or researcher the ability to delineate very small changes in visual capability, either as compared to the population or from visit to visit. VectorVision®’s CSV-1000 device is considered the standard of care for clinical trials. VectorVision® is a wholly-owned subsidiary of Guardion.

About WallachBeth Capital, LLC
